PROFESSIONAL SUMMARY

Aspiring software developer studying Software Engineering at Debre Markos University, with an interest in software development, artificial intelligence (AI), and machine learning. Has hands-on project experience building applications including the DMU Election System and Amharic Voice Banking System, using technologies such as Python, Django, Flask, SQLite, HTML, CSS, and JavaScript. Has completed online AI learning through Ethio-Coders and e-learning platforms, and is eager to deepen AI and machine learning knowledge, build intelligent applications, and solve real-world problems through technology.

EDUCATION

Debre Markos University
Software Engineering | Expected graduation: 2028

TECHNICAL SKILLS

Programming languages: Python, C#, C++
Web development: Django, Flask, HTML, CSS, JavaScript, PHP
Databases: SQLite
Tools & version control: Git, GitHub
Areas of interest: Artificial Intelligence (AI), Machine Learning

PROJECTS

DMU Election System
A university election system project intended to support digital election activities and election management. View repository

Amharic Voice Banking System
A Python-based banking application project focused on Amharic voice interaction and customer banking operations. The project uses SQLite for data storage.

COURSES & CERTIFICATES

Artificial Intelligence Fundamentals — Udacity, Nanodegree Program Completion Certificate. Awarded February 23, 2026.

e-SHE: CE104's Set Goals to Manage Your Time — Course offered by the Ministry of Education. Verified Certificate of Achievement, issued March 4, 2025.

LANGUAGES

Amharic, English
